

# Hyperautomation Assessment

Automate  
Differentiate  
Accelerate

## Leverage the Microsoft Power Platform to automate business processes & achieve big results.

Hyperautomation involves using advanced technologies to automate business processes. We leverage Microsoft Power Platform to implement hyperautomation, starting with small, manageable projects and scaling up to achieve big, transformative results. Our assessment helps you to achieve:

### Competitive Advantage

Gain an edge through strategic & innovative advancements

### Enhanced Productivity

Implementing automation to simplify tasks and boost productivity

### Scalability

Start small, automate efficiently and adjust as the industry evolves

### Data Accuracy

Using automation to ensure reliable and consistent data

### Cost Savings

Lowering operational costs by optimizing processes

## What do we need from you?

- ✓ Assemble stakeholders
- ✓ Establish Key Account Structures
- ✓ Ensure Key Stakeholder Availability
- ✓ Ensure Access to IT Systems

## What can you expect from the assessment?

### Detailed Analysis:

A comprehensive evaluation of your organization's current automation capabilities, identifying strengths, weaknesses and opportunities for improvement.

### Actionable Insights:

Specific recommendations on high-impact automation opportunities, tailored to your business needs and objectives.

### Roadmap for Implementation:

A strategic plan outlining the steps required to achieve your automation goals, including prioritization of initiatives and timelines.

## What's included in the assessment?

### Kick-off & Discovery

Set clear goals for the assessment and identify specific processes and areas to evaluate. Gather stakeholders from various departments. Identify inefficiencies, bottlenecks and areas where automation can add value.

### Discovery Review

Transparent insights related to our first findings combined with customer feedback.

### High-level analysis

Identify any hyperautomation use cases, create a detailed plan that outlines prioritized automation initiatives, timelines and resource requirements. Select the appropriate solutions based on the assessment findings.

### Closing & Reporting

Sharing final conclusions, including action list and responsibilities.

## Ready to explore the possibilities?

For all the above, a workload estimation will be provided.

For more information on what this could look like for your organization, simply reach out to your account manager.
