

License Optimization Review

Visibility
Control
Savings

Leverage License Intelligence to reduce risk, reclaim value, and cut costs.

Our License Optimization Review provides a strategic overview of how licenses and user roles are managed across your systems. It helps organizations to:

- ✓ Identify inactive or underutilized users
- ✓ Analyze security roles and access levels
- ✓ Eliminate unused or redundant users
- ✓ Optimize license allocation
- ✓ Mitigate compliance and security risks
- ✓ Cut unnecessary licensing costs

What's included in the assessment?

Kick-off & Discovery

Initial alignment on prerequisites, deliverables, resources and roadmap. Gathering information related to the current users, roles and licenses as well as defining inactive users.

Discovery Review & In-depth analysis

Share transparent insights related to our first findings and align on focus areas for deeper analysis. Conduct key insights into duties and privileges that result in elevated licensing requirements.

Closing meeting & evaluation report

Sharing final conclusions, including action list and responsibilities.

What do we need from you?

- ✓ Admin access to non-production environment
- ✓ Access to PPAC
- ✓ Availability of stakeholders

What can you expect from the assessment?

Insights related to unused user accounts that can be deactivated as well as unused roles that can be removed.

Best practice proposition related to your current **duties and privileges** to mitigate (data) breaches and minimize the licensing costs.

Optional **training proposal** to improve your understanding of **user security governance**.

Ready to explore the possibilities?

For all the above, a workload estimation will be provided for execution and/or coaching sessions.

For more information on what this could look like for your organization, simply reach out to your account manager.
