

Performance Assessment

Gain insight
Streamline storage
Boost system speed

Leverage Performance Insights to drive smarter & faster operations.

Our Performance Assessment offers a high-level review of how effectively your systems support business operations. It focuses on uncovering hidden inefficiencies and performance risks that may impact user experience, scalability, and cost-effectiveness. This assessment helps you to:

- ✓ **Analyze form and data inquiry performance**
- ✓ **Evaluate batch job duration**
- ✓ **Reduce waiting time for end users**
- ✓ **Uncover performance bottlenecks**
- ✓ **Improve operational efficiency**
- ✓ **Cut infrastructure and support costs**

What's included in the assessment?

Kick-off & Discovery

Initial alignment on prerequisites, deliverables, resources and roadmap. Gathering information related to long running activities (forms, batch jobs and data inquiries) and number sequence usage.

Discovery Review & In-depth analysis

Transparent insights related to our first findings combined with customer feedback on time-intensive operations. Define best practice optimization actions related to the number sequence usage as well as low-hanging fruit optimization actions for long running activities or time-intensive operations.

Closing meeting & evaluation report

Sharing final conclusions, including action list and responsibilities.

What do we need from you?

- ✓ A copy from production to a non-production environment
- ✓ Availability to an up and running development environment
- ✓ Availability of ApplInsights with 30 days of history
- ✓ Access to LCS / PPAC
- ✓ Availability of stakeholders

What can you expect from the assessment?

 Insights related to **long running forms, batch jobs and data inquiries**, supplemented with low-hanging fruit optimizations.

 Best practice proposition related to your current **number sequences setup**.

 Optional **setup of a monitoring (and alerting) tool** to enhance your understanding of the applications performance.

Ready to explore the possibilities?

For all the above, a workload estimation will be provided for execution and/or coaching sessions.

For more information on what this could look like for your organization, simply reach out to your account manager.
